August 13.- Mrs. An- Mars Hill, N. C. visited nd daughter-in-law, Rev. J. H. Anderson last week d the graduation of her gewood College Saturday. Mrs. W. M. Black and Rives Black visited in of Rev. and Mrs. J. S. Lexington Sunday.

T. Terry was called to Thursday due to the her daughter, Mrs. B. A.

Mrs. Melvin Davis, of isited relatives here last

R. Brightwell, Mrs. H. ll, Mrs. E. N. Cunning- Miss Mary Rives Black Tuesday at Jamestown.

Mrs. Frank Gilliam and isited his mother, Mrs. lliam, of Lynchburg Sun-

Canada has returned home nding several weeks with t Ashland.

B. Fitzgerald has returned it to her son-in-law and Mr. and Mrs. Norman Buckingham.

Mrs. Ashford George and Richmond visited his Embry Davis Sunday.

H. McCall and Mrs. Z. pent Tuesday in Lynch-

. Hopkins, of Newport iting his daughter, Mrs. is.

S. C. S. of the Methodist e at the church Monday J. W. D. Canada was

ian Wall, of Enfield, N. iday in the home of her d sister-in-law, Mr. and Payne.

C. Dudley attended an conference at Philadel- eek.

d Mrs. Robert Quick, of pent Sunday in the home d Mrs. W. J. Payne.

e Farrar, who has been r cousin, Betty Woodson e of her parents, Colonel harles Woodson, of Rich- expects to arrive here r Friday. Mrs. Stuart r and daughters, Anne Sally Farrar will accom- o her home in Pearisburg of several days. rt Farrar has returned h Carolina tobacco mart, after spending the week-end at his home here. Mr. Farrar will spend this week-end visiting relatives at Myrtle Beach, South Carolina.

Mrs. N. Kenneth Farrar, of Pearisburg, Va. spent several days last week with the Farrar families here. She returned home Saturday accompanied by her husband, Major N. Kenneth Farrar, who concluded his training at Fort Lee for the year.

About The Home

About your home.. . ... —— ..
By Frances Dell

Travel influence is showing up more and more today in furniture styles. Designers are seeking inspiration from the Scandinavian countries, from Spain, Italy and the Far East.

Foreign influence is becoming even more important with the beautiful new lines inspired by such countries as Persia, India and Indo-China.

Much of its recent popularity has been attributed to its special fitness for today's open and ariy rooms and to its simplicity of design. The Far East influence eactually goes back two centuries and it not a new favorite in American homes.

Chippendale borrowed some of his best motifs from the Orient. During the 17th and 18th centuries Chinese accessories for the home were brought from the East by numeroos seafarers to be combined with the carved and painted furniture of both the French and English courts of their day.

Modern designers are taking full advantage of the luxurious look that can be given to furniture by the addition of simple, classic Oriental lines in tables and accessories, many with bright, clear lacquer shades.

Italian Provincial has always been a favorite with decorators. Today many pieces are availbale in a lower price range than ever before. These Italian Provincial pieces are a rich looking but practical contribution to the home.

The simple grace of the Italian Provincial look is often set off by deeply scored panels or touches and canted ends. A soft gray-brown shade generally characterizes the furniture.

Some manufacturers are touring to the Orient for Accent pieces. One such is a chest, lacquered in bright orange, with flat brass decoration. Another uses Japanese motifs on gold leaf squares on a chest with rounded legs.

Can't Find Him

There is no such animal as the last housefly. Kill him a thousand times and he comes back, meaner than ever. —The Toledo Blade.

Atomic Fall-Out Held Threat to Future Generation

MEXICO CITY — The radio-active fallout particles being spread throughout the world as a result of atom bomb tests, and uncontrolled antibiotic therapy are the seeds of chronic illness and premature death in present and future generations, an American expert on genetics warned here.

The danger of both were reported by Dr. Edwin J. Grace, of the Grace Clinic, Brooklyn, N. Y., speaking before the congress of the International College of Surgeons.

"Radio-active fallout from atomic tests may induce dangerous cellular mutations(Changes in the characteristics of an organism) in man with untoward effects on present and future generations," he said. "Likewise, the genetic changes caused by inadequate antibiotic therapy must be prevented."

He said wartime research brought out that combinations of antibiotics delayed or prevented the emergence of resistant bacterial strains. This technique, he reported, has been improved by a combination of antibiotics in a detergent solvent (aerosol wash) a refinement of that used in the household.

The combination, he said, results in an extensive diffusion of the antibiotic into a wound and diminishes greatly the need for many extensive procedures. He added:

"The detergent solution so enhanced therapy that previously inadequate doses immediately became adequate in certain instances, and produced an effectiveness beyond their additional potential."

Dr. Grace said an antibiotic in a detergent also is being inhaled as a mist in the treatment of many infectious lung diseases. It also is being used in cases of sinusitis (inflammation of the sinus.)

Sees Big Year for Educational TV

ANN ARBOR, MICH.—This year will be the biggest yet for experimentation in teaching by television, believes Edward Stasheff, associate professor of speech at The University of Michigan.

"I predict that a great many elementary schools will experiment during the coming year with closed circuit TV, either in one school or in a group of two or three schools situated close enough so that fewer miles of cable will be needed to connect them," he says.

TV's success in imparting factual information has already been proved, the U-M professor believes. The next steps are to find some way of getting around the loss of human contact and to offset the very natural prejudice against anything mechanical and impersonal on the part of both students and educators.

The professor reports that on the college level perhaps the most significant work has been done at the Pennsylvania State University, where many courses covering almost the entire curriculum have been taught. On the high school level, experiments in Cincinnati showed that a chemistry class learned more by television than the control group in the classroom did.

Pond Algae May Be Newest Fuel Source

BERKLEY, CAL.,—Algae, the tiny, single-cell green plants common to stagnant ponds, may be harnassed to provide man with a new source of fuel.

Researchers at University of California have obtained small quantities of methane gas, a basic building block for the production of gasoline and other fuels, by controlling a series of natural processes involving the growth and decay of algae.

In nature, algae cells convert and store the sun's energy by a process known as photosynthesis.

Cost Index Affects Every Pocketbook

MINNEAPOLIS—How hard will it actually hit your pocketbook if the U. S. living cost index keeps on climbing in 1957?

If you are the head of a typical non-farm family in the $5,000 bracket, you can figure that from here on it will cost you about $34 per year for each full point's rise in the index.

Farm Exports Drop

WASHINGTON—Exports of United States farm products will drop during the first half of 1957, the Agriculture Department predicts, citing the fact that the Suez crisis has trimmed the pocketbooks of some foreign customers.

While exports will continue at a "high" rate, the Department does not expect them to equal the $2,300,000,000 rate set in the last six months of 1956.

Stonewall

Stonewall, Aug. 13.- My, my, these hot, dry days seem to get more humid every day. We hope and pray that it will rain soon and get cooler.

Our community is so sorry to hear that our beloved doctor, Dr. R. H. Cross is on the sick list. We do hope that he will have a speedy recovery. He is loved by everyone who knows him and is such a fine man and doctor.

Mr. and Mrs. Sep Spencer, of Petersburg, spent last week with Mr. and Mrs. Irby Wheeler.

Mr. and Mrs. Wallace Bondurant and family and Mr. and Mrs. Tom Davidson and son spent Sunday with Mr. and Mrs. Lester Carson.

Mr. and Mrs. Joe Stephenson Jr. and little daughter, Cynthia Lee, of Norfolk, spent several days this week with her parents, Mr. and Mrs. E. L. Chick. They were accompanied home by their other daughter, Janet Anne, who has spent the past month with her grandparents, and aunt and uncle, Mr. and Mrs. Henry Beard. A family reunion was held for them all on Sunday at the home of Mr. and Mrs. Beard at Appomattox.

Rev. and Mrs. Charlie Spain and children, of Alabama; Mrs. H. B. Jennings, of Culpeper, and Mr. and Mrs. George Jennings and family, of North Carolina, are visiting Mr. and Mrs. Parks Jennings.

Rev. and Mrs. Bert Wilson and children, of Covington, visited Mr. and Mrs. Lester Carson on last Thursday.

Mr. and Mrs. Hugh Braford and children and Mrs. J. E. Burnette spent last Sunday at Natural Bridge with Mr. Braford's parents.

Mr. and Mrs. Wilton Routon and two girls, Kitty and Bettie, Mr. and Mrs. C. D. Carson and Mrs. Rob Thornhill visited Mr. and Mrs. Joe tephenson, Jr. and the Chicks over the week-end.

Mr. and Mrs. Harry Lawson, of Charlottesville spent the week-end with her parents, Mr. and Mrs. Rufus Burnette.

Sorry to hear that Mrs. Lyle Caldwell is on the sick list. We hope for her a speedy get well.

Rev. Aaron Smith preached at Bethel Church on Sunday morning. He was the dinner guest of Mr. and Mrs. Lyle Thomas.

Mr. and Mrs. Dick Thomas and children, of Mississippi are spending a vacation with her parents, Mr. and Mrs. C. M. Stratton.

Miss Madelyn Bondurant is spending some time with her grandparents, Mr. and Mrs. W. T. Younger and aunt, Mrs. Ruby Oaks, of Rustburg.

Health and Beauty

Those who want to be well must give heed to the proper treatment of their minds and bodies.

Do you remember the account of the young Hebrew exiles in Babylon and how they refused to drink the great king's wine or to eat the food that was served at his table?

At the end of a certain length of time, they were compared with the other young men of the court who had habitually drank wines and ate the richest of viands. The Hebrews were so far superior mentally and physically that the king was convinced that plain fare, Godliness and clean living produced a higher type of men than those who made a habit of indulgence in the practices of the fashionable set of his court. Daniel, one of the young Hebrew exiles, became one of the greatest statesmen, prophets and writers of all time.

People in our own day, even the educated know but little about the science of nutrition. On every side, we see many who are suffering from malnutrition. "Peaked faces, bowed legs, and shaky nervous systems are only a few of the manifestations."

A critical period has arrived in our time when the world seems to be looking to the United States to feed them. Far be it from me to say that we should not share with others who are less fortunate than ourselves. Should we feed Europe and let our own people starve?

Henry A. Wallace, when Secretary of Agriculture, said in the foreword of "Food and Life," a book put out by the Department of Agriculture: 'Fifty per cent of the United States do not get enough in the way of dairy products, fruits and vegetables to enable them to enjoy full vigor and health, and a large number do not get enough because they cannot afford it. Human beings, as well as animals, must be well fed if they are to do their best and give their best."

Life is going to be long, hard race for most of the younger generation. For that reason they must be fitted for the struggle by plenty of simple food, adequate sleep, and abstinence from alcoholic liquors. To be equal to the struggle, they must take care of their bodies and their minds.

Appomattox is a growing town.

Industrial Note

Reading the motor accidents, we are led to believe that this industry has the greatsst turnover of any.
—Atlanta Constitution.

Rather Neat, This

Toastmasters fall roughly into two groups: The flip kind, and those who introduce the distinguished guest in a tone of reverent awe, as if he were being unveiled.
—Detroit News.

Insurance is a solid foundation

A Nationwide plan is the sure, solid means of building for tomorrow. Provides security for you, protection for your family. A Nationwide representative will gladly help you plan a sound dollar-wise program to meet your exact needs.
